Don't let us down: US climate change talks in Cancun

UN climate change méthode

discuss gr

- an accord is highly needed

The meeting in Cancun is organised to talk about the global warming and reduce its effects <sup>all over</sup> on the world. Climate change really affects parts of the world, especially the <sup>gr</sup> poor countries which are destroyed because of the progress of <sup>the</sup> Rich countries.

Vague

The Copenhagen conference is not enough. ~~If we don't do anything, things will worsen.~~ Many people <sup>who</sup> think that this meeting is useless because it is impossible to stop global warming but <sup>vague</sup> others think that <sup>cannot</sup> we can't stop the effects but <sup>we</sup> we can reduce them.

methode  
passer par le passé

This solution is good but the concurrence between poor and rich countries can cause problems to this talk. Developing countries <sup>are</sup> will be torn between keeping their increasing economy <sup>protecting</sup> ~~cutting it~~ or <sup>booming</sup> accepting a slowdown.

- Why are they opposed? They disagree over funding
