

UNIVERSITÄT
BAYREUTH

UBT at a glance

*6 online sessions to discover the research
environment of the University of Bayreuth*

18 – 25 January 2021
6 - 7:30 pm via ZOOM

Why this event?

The University of Bayreuth is a young university (the famous “under 50”) and is strongly committed to further international developments. Its interdisciplinary profile offers students and researchers a diversity of opportunities they may have not heard of, yet. With this event, we want to showcase 5 focus areas to incentivize cooperation for teaching, research and mobility projects.

By giving the audience the possibility to discuss directly with the scientific coordinators across borders and time zones, we want to keep on connecting and facilitating interactions. Hopefully, this first virtual meeting with UBT will help generate new ideas for collaboration

And because funding is crucial, we want to let our future partners know how they can get support from our Gateway Office to identify the right scheme for their project and what kind of fundings are available.

Who can attend?

It aims at everyone interested in developing mobility or joint training projects with the University of Bayreuth at all academic levels:

- Master’s students,
- PhD candidates,
- postdoctoral researchers,
- professors and researchers,
- international officers...

Companies interested in developing public-private partnerships are more than welcome to join the event.

Programme
